Frontend Engineer with 8+ years of experience building scalable web applications using Vue.js, TypeScript and modern frontend architectures. Currently developing enterprise solutions for EnBW through Nearshore Portugal, creating reusable Vue 3 components integrated with Contentful CMS. Throughout my career, I have worked on international projects across the energy, telecommunications, recruitment and fintech sectors, delivering maintainable and high-performance frontend solutions. My experience includes Vue.js, Nuxt, TypeScript, SCSS, AngularJS, automated testing and component-driven development. I enjoy solving complex frontend challenges, improving application architecture and creating reusable, accessible and high-quality user interfaces. I am particularly interested in modern frontend engineering, performance optimization and scalable software design.

Employment History

Frontend developer / Contentful Manager — EnBW, Nearshore Portugal, Lisboa

AUGUST 2024 — PRESENT

Develop and maintain reusable Vue 3 components integrated with Contentful CMS, supporting the company's customer-facing web applications.

Build scalable and maintainable frontend solutions using Vue 3, TypeScript and SCSS.

Collaborate with designers, backend engineers and product teams to deliver new features and improve existing user experiences.

Contribute to code quality through code reviews, architectural discussions and frontend best practices.

Support the evolution of the frontend architecture by improving component reusability, performance and maintainability.

Vue 3 TypeScript SCSS Contentful CMS

Frontend developer — TLS Contact, Aubay Portugal, Lisboa

JUNE 2023 — JULY 2024

Contributed to the development of the next generation of the TLScontact platform.

Worked within a newly designed frontend architecture, applying SOLID principles and modern software engineering practices.

Developed scalable and maintainable frontend features while collaborating with cross-functional teams.

Participated in architectural discussions and implementation of reusable application components.

Vue.js TypeScript SOLID

Frontend developer — Celfocus, Aubay Portugal, Lisboa

AUGUST 2022 — MAY 2023

Developed frontend pages for new Vodafone Ireland digital services using Adobe Experience Manager (AEM) and AngularJS.

Worked within a Waterfall delivery model while collaborating with multidisciplinary teams.

Maintained and extended a legacy AngularJS codebase, balancing feature delivery with long-term maintainability.

Adapted quickly to enterprise legacy technologies and established development processes.

AngularJS Adobe Experience Manager (AEM)

Frontend Web Developer, FLOW Executive Finders, São Paulo

JANUARY 2022 — JULY 2022

Developed a recruitment platform using Vue 3 (Composition API), TypeScript, SCSS and Jest.

Implemented new features with a strong focus on component reusability and maintainable architecture.

Collaborated in an Agile environment, participating in planning, code reviews and iterative product delivery.

Contributed to frontend testing and application reliability through automated unit tests.

Vue 3 (Composition API) **TypeScript** **SCSS** **Jest**

Frontend Web Developer, Iterative, São Paulo

JUNE 2021 — JANUARY 2022

Developed new features for the "O Novo Mercado" platform using Vue.js.

Collaborated with the engineering team to improve development workflows and team productivity.

Participated in feature implementation, bug fixing and continuous platform improvements.

Worked closely with product stakeholders to deliver business requirements.

Vue.js **SCSS**

Junior Software Developer, Risknow.ai, São Paulo

JULY 2018 — JUNE 2021

Started as a Full Stack Developer building features with Python and React before specializing in Frontend Engineering.

Developed modern web applications using Vue.js (Nuxt), React (Next.js) and Nx Workspace within a monorepo architecture.

Built reusable frontend components and implemented responsive user interfaces.

Automated report generation and internal processes using Python and Apache Airflow.

Collaborated across multidisciplinary teams, contributing throughout the software development lifecycle.

Vue.js (Nuxt) **React (Next.js)** **TypeScript** **Nx** **Python** **Apache Airflow**

Intern, Agilus Informatica, São Paulo

OCTOBER 2016 — JULY 2018

Supported Microsoft database operations by importing and validating customer datasets using SQL.

Created reports based on processed data to support business analysis.

Worked with relational databases, data validation and SQL scripting.

Developed a strong foundation in database management and data processing.

SQL **Microsoft SQL Server**

Education

Computer Engineering, Centro Universitário Senac, São Paulo

2015 — 2019

Engineer's degree. Learned the fundamentals of hardware, software, electronics, embedded systems, networks and IoT.

Certifications

Certified Mid-Level Vue.js Developer

VUE.JS DEVELOPER LEVEL I · CERTIFICATES.DEV · VUE SCHOOL · AUGUST 27, 2026

Official Vue.js certification after passing an examination developed with Vue School and members of the Vue.js core team.

Certificate number: CMVD-009271

<https://certificates.dev/c/a299b2f5-6e7e-43c2-9dc7-e21e0af54588>
